

Industrial Spaceheater - no. 1400

- No electric supply required
- You just need a cylinder of gas
- With double skinned top to reduce temperature of top during burning.
- Automatic piezo ignition
- Flame failure security
- Superb swirl burner gives compact high convectional heat output varying from 15 to 25kW
- A 1 bar maximum outlet pressure regulator must be used with this heater
- We suggest you use the Tinyreg No. 1051/01 for good control of the heat

Ideal for

- heating warehouses,
- small factories,
- outhouses, and
- for drying out buildings.

Heat input kW (Btu/h)	Gas pressure bar (psi)
17 (60000)	0.5 (7)
21 (73000)	0.7 (10)
25 (84000)	1.0 (15)
